

What was claimed in amendment A includes:

Claim 1, page 8/9. Cancel and substitute 7. Claim 7, cancel.

Claim 2, page 8/9. Cancel and substitute 8. Claim 8, cancel.

Claim 3, page 8/9. Cancel and substitute 9. Claim 9, cancel.

Claim 4, page 8/9. Cancel and substitute 10. Claim 10, cancel.

Claim 5, page 8/9. Cancel. No substitution.

Claim 6, page 8/9. Cancel and substitute 11. Claim 11, cancel.

Applicant claims:

Claim 12. A diver's weight consisting of high density metal, said weight being longitudinally solid with a back, front, top, bottom, and two ends, including external and internal surfaces, said weight encompassing three or more belt receiving through apertures, the length of said weight being adequate to contain three or more belt receiving apertures, said apertures located in parallel alignment perpendicular to the horizontal plane length of said weight, said weight having a height in excess of the length of said apertures, said apertures having a length in excess of the width of a diver's belt (supplied by others), said apertures having a width in excess of the thickness of said diver's belt, said apertures in nearly equal distant spacing as is aesthetically or practically desired, said weight having thickness of one fourth of the height of said weight, and the desired height of said weight determined by dimensional adjustment of one or more axes'.

Claim 13. The diver's weight as described in claim 12, said weight combined with said diver's belt by the sequential weaving of said diver's belt, side to side of said weight, through said apertures, until three or more said apertures or total said apertures thereof, are in containment of said diver's belt, introducing a frictional non slip environment between said weight and said diver's belt.
